# Alle, complete asepsis for dental surgery

Alle is a new line of disposable products that has been specially designed to create an uncontaminated sterile field for dental surgery, thus preventing the risk of infections. Alle features a comprehensive selection of products to enable dental practices to meet the protection criteria required in operating rooms.

Alle is a brand by Euronda S.p.a., one of the leading manufacturer of medical devices for infection control in dental practices. With Alle, Euronda is making an important addition to its range, which perfectly reflects its mission: total protection for dentists, staff and patients.

# Sterile Sets

A comprehensive line of disposable sterile sets to prepare surgical fields and protect dentists, assistants and patients. They are designed to offer an optimum response to the needs of all surgery procedures in dental practices. The contents of the sets depend on the type of procedure. Each one contains a number of sterile products to meet the requirements of different protocols. There are two sets that are designed for implants and another two that are designed for preparing surgical fields.

5

## Plus

- Designed to cater to the needs of all surgical procedures
- Containing: gowns, surgical caps, face masks and shoe covers
- Provided in compact packaging to optimize your storage space
- Sterility guaranteed for 5 years

6

## Patient Set

Sterile apparel for patients. A set designed for gowning patients undergoing all types of implant, periodontal, dental surgery and maxillofacial procedures.

Set code	Content	Size cm	Material	Color	Pieces
270101	Water-repellent gowns with elastic cuffs	L= 115	Nonwoven	white	1
	Round cap with elastic		Nonwoven	light blue	1
	Waterproof shoe covers		PVC	light blue	2

## Doctor Set

The sterile kit for routine procedures. Specially designed for use by dentists during short procedures.

Set code	Content	Size cm	Material	Color	Pieces
270102	Water-repellent gown with cotton cuffs	L= 115	Nonwoven	light blue	1
	Surgical cap with adjustable ties		Nonwoven	light blue	1
	Monoart® facemask PTC 3		Nonwoven	light blue	1
	Waterproof shoe covers		PVC	light blue	2

## Assistant Set

For assisting during dental procedures in complete safety.  
Specially designed for use by assistants during short  
procedures.

Set code	Content	Size cm	Material	Color	Pieces
270103	Water-repellent gown with cotton cuffs	L= 115	Nonwoven	light blue	1
	Round cap with elastic - mod. Charlotte		Nonwoven	light blue	1
	Monoart® facemask PTC 3		Nonwoven	light blue	1
	Waterproof shoe covers		PVC	light blue	2

## Implant Set

The best possible protection for all implant procedures.  
Specially designed for implant surgery. Produced in conjunction with experts in dental surgery.

Set code	Content	Material	Size cm	Color	Pieces
270105	Water-repellent gown with cotton cuffs	Nonwoven	L= 115	light blue	3
	Surgical cap with adjustable ties	Nonwoven		light blue	1
	Round cap with elastic	Nonwoven		light blue	2
	Monoart® facemask PTC 3	Nonwoven		light blue	3
	Rectangular drape	Nonwoven + polyethylene	75x90	light blue	1
	Rectangular drape	Nonwoven + polyethylene	50x50	light blue	2
	Drape with opening without adhesive	Nonwoven + polyethylene	50x75-Ø6	light blue	1
	Hand Towels - Dry paper	Nonwoven	30x40	white	2

10

## Base Set

All of the essentials for use before the start of every procedure. Specially designed for implant surgery. The product of joint studies with experts in dental surgery. A modified version of the Implant Set.

Set code	Content	Material	Size cm	Color	Pieces
270106	Water-repellent gown with cotton cuffs	Nonwoven	L=115	light blue	1
	Water-repellent gown with elastic cuffs	Nonwoven	L=120	light blue	2
	Surgical cap with ties	Nonwoven		light blue	1
	Round cap with elastic	Nonwoven		light blue	2
	Monoart® facemask PTC 3 with ties	Nonwoven		light blue	1
	Monoart® facemask PTC 3	Nonwoven		light blue	2
	Drape with "U" shaped cut with adhesive	Nonwoven + polyethylene	75x90 cut 11x9	light blue	1
	Rectangular drape	Nonwoven + polyethylene	50x75	light blue	2
	Tubing sleeve with elastics	PVC	120x7	transparent	1

## Protection Set

Protect the patient and the work environment. A selection of sterile drapes and protective items to cover and prepare surfaces and patients during surgical procedures.

Set code	Content	Material	Size cm	Color	Pieces
270107	Drape with U shaped cut without adhesive	Nonwoven + polyethylene	100x150 cut 11x30	light blue	1
	Rectangular drape	Nonwoven + polyethylene	75x90	light blue	1
	Rectangular drape	Nonwoven + polyethylene	50x75	light blue	2
	Tubing sleeve with adhesives	PVC	120x7	transparent	2

12

## Drapes Set

Sterile drapes that are ready for all needs. A set of drapes for preparing areas for surgery, designed for covering surfaces and patients.

Set code	Content	Material	Size cm	Color	Pieces
270108	Rectangular drape	Nonwoven + polyethylene	50x75	light blue	2
	Drape with U shaped cut with adhesive	Nonwoven + polyethylene	50x75 cut 11x9	light blue	1

# Personal protection

15

# Gowns and caps

Barrier systems (sterile disposable drapes and gowns) are used during surgical procedures to prevent the movement of micro-organisms between sterile and non-sterile zones.

When they are worn properly, they help to keep surgical fields sterile. Well-fitted, water-repellent, soft and breathable, they guarantee maximum comfort during procedures. Some disposable barrier systems (surgical caps and bandanas) come in both sterile and non-sterile versions to meet the comfort needs of all patients and members of staff.

17

## Plus

- Durable and water-repellent
- Extremely breathable
- Made of Microfiber, water-repellent Nonwoven fabric and Softesse®
- With cotton cuffs, hand towel and surgical pleats
- Sterility guaranteed for 5 years

## **SMS Microfiber gown - Expo model**

Made of light, water-repellent and extremely breathable SMS Microfiber. Both sterile and non-sterile versions are available, to cater to all needs.

**Material:** SMS microfiber 45 gr/m<sup>2</sup> **Color:** light blue

### Non-sterile model

Code	Size	Pieces
270402	M	30
270403	L	30
270404	XL	30

### Sterile model

Code	Size	Pieces
270405	M	12
270406	L	12
270407	XL	12

## **Softesse® gown - Expo model**

Softesse® Nonwoven fabric is the most cutting-edge material on the market. It is both exceptionally comfortable and extremely water-repellent. It is specially designed for long, delicate surgical procedures. Sterile product.

**Material:** Nonwoven fabric Softesse® 70 gr/m<sup>2</sup>  
**Color:** light blue

Code	Size	Pieces
270408	M	12
270409	L	12
270410	XL	12

## Water-repellent gown

Comfortable and functional water-repellent gown with cuffs, recommended for short everyday procedures and for complementing patient protection. Both sterile and non-sterile versions are available, to cater to all needs.

**Material:** water-repellent Nonwoven fabric Spunbond  
**25 gr/m<sup>2</sup>** **Size:** one size, length 110 cm

### Non-sterile model

Code	Color	Pieces
270411	green	50
270412	light blue	50

### Sterile model

Code	Color	Pieces
270413	green	50
270414	light blue	50

## Microfiber surgical pajamas

Short-sleeved scrubs, with a top and trousers. Made of light, water-repellent and extremely breathable SMS Microfiber. Non-sterile product.

**Material:** microfiber SMS 35 gr/m<sup>2</sup> **Color:** light blue

Code	Size	Pieces
270415	M	20
270416	L	20
270417	XL	20

## Softesse® cap

Surgical cap with elasticated back. Practical and quick to put on. Made of Softesse® nonwoven fabric, which is both exceptionally comfortable and extremely water-repellent. Non-sterile product.

**Material:** Nonwoven fabric Softesse®

Code	Color	Pieces
270502	light blue	50

20

## Round cap with elastic

Round cap with elastic made in Nonwoven fabric. Non-sterile product.

**Material:** absorbent Nonwoven fabric

Code	Color	Pieces
270505	green	100
270506	light blue	100

## Cap with adjustable ties

Surgical cap with adjustable ties made in Nonwoven fabric. Non-sterile product.

**Material:** absorbent Nonwoven fabric

Code	Color	Pieces
270503	green	100
270504	light blue	100

**Below:**  
a close-up of the green Monoart® bandana, together with a Monoart® face mask and a water-repellent gown.

## Monoart® Bandana

Comfortable cotton bandana with adjustable strings, making them adaptable to all head sizes. It can be sterilized at 121°C. Non-sterile product.

**Material:** cotton autoclavable

Code	Color	Pieces
262001	light blue	10
262003	green	10

# Other items of apparel

23

## Monoart® disposable latex gloves

Monoart® disposable examination gloves provide hygienic and a comfortable protection for your hands. They are strong, stretchy and designed to guarantee outstanding tactile sensitivity. The polymer lining ensures that they are particularly easy to put on and reduces the risk of skin irritation. In addition, the rough micro-texture on the surface gives superb grip in all conditions.

- Latex powders-free
- Non sterile
- Ambidextrous
- AQL 1,5
- Low protein (< 50 µg/g)

**Material:** latex **Color:** blue

Code	Size	Pieces
260105	XS	100
260106	S	100
260107	M	100
260108	L	100

24

## Monoart® face mask Protection 3

3 layers disposable hypo-allergenic face mask, for protection against aerosol and dust: soft, water-repellent Nonwoven fabric; PFE (Particle Filtration Efficiency) filter and BFE (Bacterial Filtration Efficiency); comfortable Nonwoven fabric cotton lining for extra absorbance of sweat and humidity. Built-in nose bridge. Non-sterile product.

**Material:** Nonwoven fabric

Code	Color	Pieces
217112	light blue	50
217114	green	50

## Monoart® face mask Protection 4

4 layers disposable hypo-allergenic face mask, for protection against aerosol and dust: soft, water-repellent Nonwoven fabric; PFE filter and BFE filter; polymeric filter for fluid resistance, 120 mmHg; comfortable Nonwoven fabric cotton lining for extra absorbance of sweat and humidity. Built-in nose bridge. Non-sterile product.

**Material:** Nonwoven fabric

Code	Color	Pieces
217132	light blue	50
217134	green	50

## Monoart® Cube glasses

Transparent operator over-glasses can be positioned over any corrective glasses, providing a 180 degree view. Modern and wrap-around design with adjustable frame stems for an excellent fit thanks to the Soft Pad technology. Heavy duty polycarbonate lens, with antiscratch and antifog treatment, that protect against impact and UV400 (sunlight) rays. In accordance with EN166 and EN170.

**Frame:** white and blue

Code	Weight gr	Pieces
261010	37	1

## Monoart® Stretch glasses

Ultra-flexible, sporty, wrap-around stretch design glasses with adjustable frame stems, ultra-flexible and extremely twist proof to offer an unbeatable comfortable fit. Heavy duty, optically controlled lens with antifog and antiscratch treatment, that protect against UV400 (sunlight) rays. In accordance with EN166 and EN 170.

**Frame:** white and blue

Code	Weight gr	Pieces
261030	26	1

**25**

## Waterproof shoe covers

Elasticated protection for footwear. It prevents contamination by limiting the transmission of the micro-organisms that are found on the soles of patients and medical staff. Non-sterile product.

**Material:** PVC **Color:** light blue

Code	Size	Pieces
270420	one size	100

a close-up of Stretch glasses,  
together with a Monoart® face  
mask and a surgical cap with  
adjustable ties.

# Protection and preparation of the surgical field

27

# Sterile drapes

When the rules of “draping” are followed, disposable sterile drapes help to create an uncontaminated environment, thus protecting the surgical area and the staff.

A range of materials, sizes and models are available. They are made of a layer of soft, absorbent Nonwoven fabric and a layer of polyethylene film that creates a barrier effect and reduces the risk of postoperative infections caused by the migration of pathogenic germs.

29

## Plus

- U-shaped cut to fit perfectly around the faces of patients
- The adhesive band prevents accidental contamination and movement
- Made of soft, extremely breathable and water-repellent Nonwoven fabric
- Water-repellent PVC side to create a barrier effect
- Sterility guaranteed for 5 years

**On the right:**  
example of the use of a table drape  
to protect a Mayo table.

**30**

## Table drape

Designed to cover the surgical table and protect the equipment. The main drape covers the instrument table and it can be used as an envelope drape in customized sets. It is folded in order to remain sterile when handled by staff.

**Material:** PVC + Nonwoven fabric **Color:** blue

Code	Type	Size cm	Pieces
270213	Mayo Table	80x120	25
270214	Instrument Table	160x190	25

## Standard drape

A highly absorbent drape made of 100% cellulose bonded with a water-repellent polyethylene layer. Ideal for protecting work surfaces.

**Material:** cellulose + polyethylene **Color:** light blue

Code	Size cm	Pieces
270218	50x50	150
270219	50x75	125
270220	75x90	75
270221	90x150	25

## Rectangular drape

Nonwoven fabric bonded with polyethylene, that absorbs biological liquids without compromising the barrier effect.

**Material:** Nonwoven fabric + polyethylene **Color:** light blue

Code	Size cm	Pieces
270201	50x50	125
270202	50x75	100
270203	75x90	50
270204	100x150	25
270205	150x200	25

## Rectangular drape with adhesive

A practical 5 cm medical adhesive strip on the shortest side of the drape can be used to secure it to a fixed point, preventing accidental contamination and movement.

**Material:** Nonwoven fabric + polyethylene **Color:** light blue

Code	Size cm	Pieces
270206	50*x75	75
270207	75*x90	50
270208	100*x150	25

\*adhesive side

## Drape with central adhesive opening

The adhesive circular shape in the centre creates an effective sterile barrier for all types of surgical procedures.

**Material:** Nonwoven fabric + polyethylene **Color:** light blue

Code	Size cm	Pieces
270215	50x50 / opening 6x9	100
270216	50x75 / opening 6x9	75
270217	75x90 / opening 6x9	50

## Drape with off-centre adhesive opening

This item has the same features as the drape with a central opening, but its off-centre opening allows optimized use of the dimensions of the drape.

**Material:** Nonwoven fabric + polyethylene **Color:** light blue

Code	Size cm	Pieces
270228	100x150 / opening 6x9	25

**Previous page:**  
example of the use of a drape with an off-centre opening.

**On the right:**  
example of the use of a drape with a U-shaped cut.

## Drape with U cut

Practical for the surgeon and comfortable for the patient: the "U" shape makes it easy to place both on the bottom lip and on the neck, creating an effective sterile barrier.

**Material:** Nonwoven fabric + polyethylene **Color:** light blue

Code	Size cm	Pieces
270209	100x150 / cut 11x30	25

## Drape with U cut and adhesive

The "U" shape makes it easy to place both on the bottom lip and on the neck, creating an effective sterile barrier. The practical medical adhesive stops the drape from moving and therefore prevents accidental contamination.

**Material:** Nonwoven fabric + polyethylene **Color:** light blue

Code	Size cm	Pieces
270210	50x75 / cut 11x9	50
270211	75x90 / cut 11x9	50
270212	100x150 / cut 6,5x30	25

## Softesse® drapes

Softesse® Nonwoven fabric is the most cutting-edge material on the market. It is both exceptionally comfortable and extremely water-repellent. It is specially designed for long, demanding surgical procedures. There are a number of different models that have been specially designed to satisfy all surgical needs.

**Material:** Nonwoven fabric **Softesse®** **Color:** light blue

Code	Type	Size cm	Pieces
270222	Rectangular drape	75x100	40
270223	Drape with U shaped cut without adhesive and cable hole for aspirator	133x200 / cut 6,5x50	10
270224	Drape with adhesive U shaped cut and cable hole for aspirator	133x200 / cut *6,5x50	10
270225	Drape with off-centre adhesive opening	100x150 / opening *6x9	25
270226	Drape with adhesive triangular opening, no panic window and velcro tube holder	133x200 / opening *11x10	5

\* adhesive side

**On the right:**  
Example of use of Softesse® drape  
with no panic window.

35

## Dentist chair cover

Disposable universal dentist chair cover composed by headrest cover, backrest cover and seat cover made in soft Nonwoven fabric polypropylene material, hypoallergenic and breathable to guarantee protection and safety for patients. Its universal size fits all dentist chair models thanks to the elasticized seams and handy ties that guarantee complete adaptability. Non-sterile product.

**Material:** Nonwoven fabric 30 g/m<sup>2</sup>

Code	Color	Pieces
264101	green	25
264100	light blue	25

# Sterile protections

A wide range of sterile products that are designed to protect a huge variety of surfaces and essential elements in surgical fields (such as tubes and wands), thus ensuring that the operating room stays uncontaminated.

## Plus

- Protection for all surfaces that are exposed to contamination but difficult to sterilize and decontaminate (such as handles and switches)
- Disposable polyethylene tubular sheaths to protect tubes that cannot be sterilized
- Sterility guaranteed for 5 years

**On the right:**  
protecting a wand with  
a polyethylene sheath and  
an adhesive strip.

**Next page:**  
application of adhesive film sheet  
on a digital control unit.

**38**

## Tubing sleeve with fixing elastics

Disposable anti-reflective transparent polyethylene tubing sleeve with open ends. Elasticated and complete with a handy card fitter for easy insertion.

**Material:** LDPE **Color:** transparent

Code	Size cm	Pieces
270310	120x7	10

## Tubing sleeve with adhesive fixing tapes

Disposable anti-reflective transparent polyethylene tubing sleeve with open ends. With two Nonwoven fabric adhesive strips for securing the ends.

**Material:** LDPE **Color:** transparent

Code	Size cm	Color	Pieces
270302	120x7	light blue	50
270303	240x7	light blue	50
270304	120x7	white	50
270305	240x7	white	50

## Adhesive film sheets

For protecting surfaces that are exposed to contamination but difficult to sterilize or clean during clinical processes (such as control panels, handles and switches).  
The adhesive polyethylene does not leave residue on protected surfaces.

**Material:** adhesive polyethylene **Color:** light blue

<b>Code</b>	<b>Size cm</b>	<b>Pieces</b>
270301	20x20	50 (10x5)

## Transparent drape with adhesive

Low-density polyethylene transparent drape with adhesive tape. Ideal for covering physiodispenser or control units.

**Material:** LDPE **Color:** transparent

<b>Code</b>	<b>Size cm</b>	<b>Pieces</b>
270227	40*x50	20

\*adhesive side

# Irrigation and aspiration

41

# Sterile irrigation and aspiration lines

Proper irrigation during the creation of an implant site plays an essential part in the crucial osseointegration of the implant and consequently the success of the procedure.

The mechanical and manual irrigation lines are compatible with the main physiodispensers and automatic systems on the market.

All of the irrigation lines are disposable Class IIa products that are subject to the requirements of Directive 93/42/EEC and 2007/47/EC.

43

## Plus

- Full compatibility with the main physiodispensers and automatic systems
- Extremely high quality component
- Sterility guaranteed for 5 years

## Mechanical irrigation line

An appropriate, well-gauged jet of liquid coolant can take a bur to optimum temperature. This can only be done with an irrigation system that has been specially produced for the different types of physiodispenser that can be found on the market.  
The tips of Alle irrigation lines can adapt to the different diameters of wand cooling needles.

### Legend

- 1 - Single irrigation
- 1/2 - Internal and external irrigation without a Y-connector
- 1/2Y - Internal and external irrigation with a Y-connector
- T - Tap to connect a second irrigation line to a second handpiece or to connect an irrigator

44

## Manual irrigation line

A manual irrigation system with a button-based flow regulator that enables assistants to keep the surgical field clean and cool the implant site. The system is also suitable for irrigation during the final fixation of implants with a torque wrench.

Code	Pieces
270630	5

## Surgical aspirator

Practical, light, manageable and comfortable during long periods of surgery. A special system stops the connectors from accidentally bending or twisting. They can be connected both to a dentist chair and to a central system. Yankauer aspirator tip available with 2.5 mm openings.

**Material:** transparent PVC

Code	Type	Length cm	Pieces
270650	without aspirator tip	220	10
270651	with Yankauer aspirator tip	250	10

**46**

## Surgical aspirator tip

Sterile surgical aspirator tip, available with 2,5 mm and 4,8 mm tip openings. The 4,8 mm tip consists of the bent aspirator tube without the light blue tip. PVC adaptors included (11 mm, 16 mm).

Code	Pieces
270644	20

# Mission asepsis: an uncontaminated workenvironment

The term “asepsis” refers to both the state of being completely free from bacterial contamination and the techniques used to eliminate contaminating agents that can cause infections during surgical procedures.

With the goal of preventing cross contamination and promoting the creation of an uncontaminated environment in every clinic, Alle provides all of the material needed for:

- The protection of staff and patients with suitable apparel
- The protection of surgical fields with sterile disposable drapes
- Sterile protection of irrigation and aspiration
- The preparation and protection of surgical tables
- The protection of surgical devices and equipment

# Euronda: over 40 years of protection in the dental industry

With headquarters in Italy, four operational branches in Europe and products sold in more than 100 countries worldwide, Euronda is one of the leading company in infection control for dental practices. In addition to the Alle sterile disposable range, it has two other specific lines of products:

Monoart®, a comprehensive range of disposable products to cater to the needs of all dental practices.

A complete line of equipment for cleaning, sealing and sterilization to support staff at every stage of the sterilization process.

All Euronda products guarantee unparalleled quality and protection for dentists, staff and patients.
